### MEDICAL STUDENTS HOSTS TO UNIVERSITY GOVERNORS AT BIG ANNUAL DINNER

Chancellor Beatty And Principal Currie Address Large Gathering—Urged Necessity of Diligent Work—Sister Universities Exchange Greetings—Medicos Have Great Tradition to Uphold—Notable Array of Medical Men Present at Enthusiastic Function

For two score years and three the Medical Under-graduate Society has held an annual banquet, but never in all these years has there been one so successful in every way as that held last night in the Mount Royal Hotel. It was an occasion that all undergraduates present may well remember in time to come.

The banquet was not only honoured by the presence of some eighty members of the Medical Faculty, but also by the presence of nearly all the worthy governors. Those at the head table were: Prof. J. J. Campbell; C. C. Cushing; W. P. Hamilton; T. M. Starkey; C. Howard; E. W. Archibald; Mr. Percy Cowans; Prof. S. E. Whitnall; Mr. Huntly Drummond; Sir Andrew Macphail; Lt. Col. Robert Stark; Prof. H. E. Birkett; Sir Charles Gordon; Prof. F. Pinay; Mr. William M. Birks; Dr. P. E. Shepherd; Sir Arthur Currie; Mr. V. W. Beatty; Dean Charles F. Martin; Mr. Justice Archibald; Dr. R. P. Rutan; Prof. Brown; Prof. W. V. Chipman; Col. Herbert Nelson; Prof. A. R. MacCallum; Veill; H. Veriel; Gordon Byers; Prof. A. T. Bazin; J. C. Meakins; E. B. Eberts; Bridges; A. A. Jordan; J. Russell; J. C. Sampson; and "Sid" Harris, president of the Society.

Following the hearty toast to the King, and the National Anthem in which fully two hundred and fifty voices joined, "Sid" Harris provoked much cheering upon announcing in behalf of Dean Martin that there would be no lectures in Medicine till ten o'clock this morning in order to give the students an opportunity to see the eclipse. He then called upon Sir Arthur Currie to propose the toast to the University.

Having welcomed the governors to the banquet on behalf of the undergraduates of the faculty "first in honour and first in play," Sir Arthur proceeded to give what he thought were the greatest aims of an University and to give some advice, best respected and always remembered to the students.

Citizenship, he said, was undoubtedly the greatest concern and ideal of any university. To be good, better, citizens should students always aspire. The university is responsible to and for the intellectual tone of the people; the students, then, must ever be responsible to their Alma Mater. What a good citizenship, he asked. Nothing new. It is the same now as it was in ancient times; and no better definition can be given than that of Plato's. In briefs it is to honour one's own soul above all else; hold virtue above all other good. This is a high ideal to set; yet the very striving for it brings out all that is best in a man; likewise must the University bring out in a man all that is best no more is possible, or can be desired of anyone. In closing he emphasized the need of hard work to bring out character, worth, good citizenship; for the makers—too numerous in univers-

ties, he regretted—are in no wise worthy of this simple though all-embracing duty, good citizenship. To make a man appreciative of this duty is the greatest lesson an University can give.

To this toast and splendid speech Mr. Beatty made reply. Mr. Beatty confessed his ignorance of medicine in humorous tones, saying, however that he knew his own family doctor very well if not too well and his efficient method of book-keeping.

He then spoke of the tremendous strides made in medicine of late, and reminded the students of their great responsibility, opportunity and fortune.

In much the same sincere manner of Sir Arthur Currie he gave some invaluable advice and encouragement to the undergraduates. Drawing on the analogy used by Thomas Carlyle concerning physical and mental fitness, he urged the students to work when working, play when playing, and think all the time. The medical profession involves great character on the part of each and every man. Diligence, Honesty, Confidence, these three are the greatest attributes of character. In closing, he urged the students to make the best of the facilities given them at McGill and wished them great success in their diverse careers in Canada or throughout the world.

Bruce Webster in proposing a toast to the Faculty made a very able speech to be responded to by Sir Andrew Macphail who stressed the importance of close relationship between the faculty and the students.

"Bonos" Little proposed the toast to the Sister universities and in reply D. N. Henderson of Toronto expressed his appreciation for the delightful occasion.

Dr. F. M. Mackay made what he called the most important toast, that to the graduating class and for his speech was duly outgazed in doggerel song by the students.

Earle Wright very ably replied to this toast. The banquet was most carefully provided for in every respect, the entertainments being very good.

The Point of View  
First: Fresh (putting up pictures)—  
"I can't find a single pin Where do they all go to anyway?"

Second: Fresh—"It's hard to tell because they're pointed in one direction and headed in another"

### RED AND WHITE REVUE

TRY-OUTS  
Monday—4-6 p.m.  
Tuesday—4-6 p.m.  
Union Ball Room.

The casting committee of the Red and White Revue will make a preliminary selection of the cast for the Revue at the above hours. All interested, irrespective of faculty or department, are requested to turn out.

### Ninety-five Per Cent Solar Eclipse

Will Reach its Maximum Point at 9.20 this Morning. Semi-darkness Will Exist. ----- Complete Details.

Beginning at nine minutes after eight o'clock, reaching its climax at 9.20, and coming to an end at 10.37, that rare occurrence, an eclipse of the sun will take place to-day. Ninety-five percent of the sun will be blotted from view, and the city will fall into a state of semi-darkness. At Toronto there will be a total eclipse. Canadian scientists have gone to Long's Corners, near Hamilton, Ontario, where the eclipse can be studied to the greatest advantage. There will not be another eclipse in this part of the country for another 219 years.

In the Faculty of Arts all nine o'clock lectures have been cancelled by Dean Mackay. In Applied Science the matter is left to the discretion of the various professors, while no definite arrangement has been made by any of the other faculties.

### Opinion of J. F. Kelly of McGill Observatory-- Dr. Eve and Party to Make Investigation.

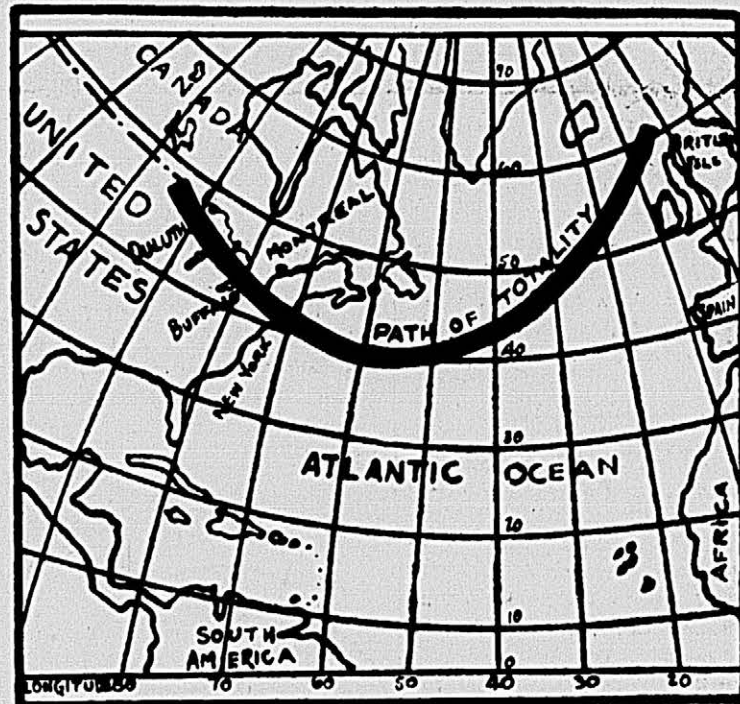

"The exact extent of the darkness in fact, in 1945, then in 1970, 1984 and in 1994. Even at 95 percent, as Montreal will have it, the eclipse will be, weather permitting, a most wonderful sight. Party to Hamilton Dr. A. S. Eve, of McGill, and a

entists everywhere are most interested, and concerning which they hope to gain new data.

The corona is the halo of light appearing to emanate from the rim of the sun. No one has as yet determined anything about it although it appears electrical in nature. On close examination the light of the corona looks like red flames leaping from the sun. All conceivable forms of apparatus have been set up to study this, when the event takes place.

#### Path of Totality

The eclipse will be total in Canada for a strip of about 100 miles through the Niagara peninsula. It will first appear, however, in northern Minnesota at sunrise, and will move eastward across the continent in a path of totality about 100 miles wide, crossing the northern end of Lake Michigan and the southern end of Lake Huron. The northern end will be about Port Elgin, Guelph, London, St. Catherine, Hamilton and Toronto. These places will be plunged into darkness. The path will cross into the United States at Niagara Falls. Ever since the first total eclipse was recorded by the Chinese in 2137 B.C. many hundreds of eclipses have taken place. The actual time that the sun has been in eclipse on the earth, however, has only been for a few hours. This is because the eclipse passes with the speed of artillery fire. From the time the moon's shadow darkens the earth in Northern Minnesota, Saturday morning, until it passes off into the Atlantic at Long Island over 1500 miles distant, fifteen minutes will elapse. It will travel at the rate of 1820 miles an hour, or half a mile per second. At any point there will only be two minutes

TOTAL ECLIPSE AREA JAN. 24  
Heavy band shows "path of totality" or where the sun is wholly obscured by the moon's shadow. The strip averages about 100 miles wide, begins in Minnesota and ends in Atlantic ocean north of British Isles.

Picture by Courtesy of Montreal Herald

cessary to use electric light. In any case the eclipse will not pass unnoticed here."

The programme of the event for Montreal as stated by Mr. Kelly will be as follows, providing the sky is clear.

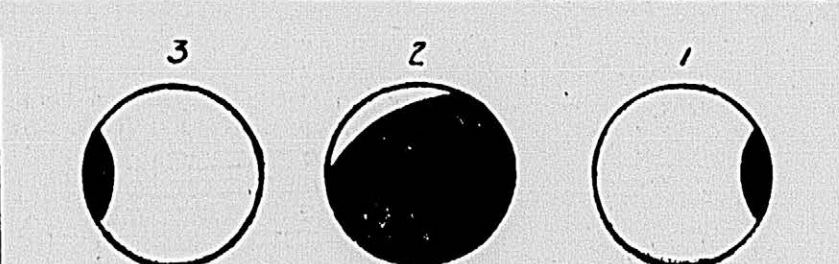

8.09 a.m. The moon will appear to bite into the right hand side of the sun, just a little above the centre. The crescent will continue from this point to grow larger.

9.20 a.m. The sun will now be covered over for the most part. Only five percent of it will be visible—a small crescent along the upper edge of the sun's disc. After this the light will stop fading and daylight will begin returning.

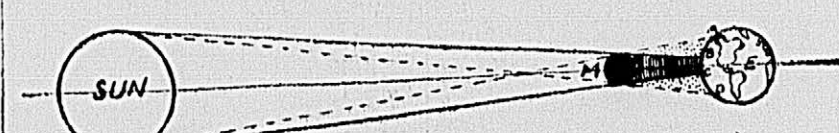

10.37 a.m. All will be over at this moment when the sun will again appear clearly shining in the sky.

For astronomers within the range of the eclipse, especially those who will witness it in its totality, the event is one of the most important of its kind. No one is now living who saw the last total eclipse in this part of the country. That event took place in 1806—118 years ago. No one now living will again see a total eclipse in this part of the country, for the next one is scheduled to take place in the year 2144. Hence those living in the path of totality will be witnessing one of the rarest sights on earth, Mr. Kelly declared.

But there will be total eclipses in other parts of this continent at various intervals. Mr. Kelly explained North America will have another one

THREE PHASES OF THE ECLIPSE  
as it will appear when viewed from Montreal  
At No. 1, the dark shadow of the moon is seen creeping across the sun's face. This will occur about 8:09 a.m. No. 2 shows eclipse at maximum with about 95% of sun's disc obscured. This will be at 9:20 a.m. No. 3 shows the eclipse ending at 10:37.

THE CAUSE OF THE ECLIPSE  
The sun, moon (M) and earth (E) are on line. The region between B and C in the shadow cone is in total darkness. In the penumbral regions A and D, the eclipse is partial. These limits will extend from Greenland to the Amazon River.

Picture by Courtesy of Montreal Herald

group of local scientists and astronomers are arranging for a special trip to Hamilton where they will be able to witness the eclipse in totality. A large camera has been set up four miles south-west of Hamilton to photograph the corona of the sun, the section in which astronomers and sci-

entists are able to actually photograph it in totality.

Cause of Eclipses  
"Supposing a man is walking around a table with a lamp on it," Mr. Kelly declared, when asked to explain the exact cause of the eclipse. (Continued on page four)

### THE HISTORY OF THE IDEA OF EVOLUTION

Interesting Lecture Before Biological Society

SIR A. MACPHAIL

Evolution no Longer Believed Opposed to Religion

"The History of the Idea of Evolution" was the subject of a one hour address given by Sir Andrew Macphail, professor of the History of Medicine before the Biological Society last night.

Macphail told his listeners, has always and a curiosity about himself, he early observed likeness and dissimilarity between objects and from this observation would arise the idea of categories, and as he subdivided these categories he observed that they all merge into each other. At this moment evolution was born, and gradually developed into a theory to account for the whole universe. At first there was only a mild curiosity, men were busy trying to keep alive to bother about evolution but later they began to think more about it, and so we get folk lore, mythology and tradition. Even in our own day men were content with creation as related in their sacred writings. Soon however the mass of material became so great that philosophers began to speculate on the nature and history of our universe.

Empedocles advanced the theory that all matter was formed of the four elements, earth, air, fire, and water. Aristotle said that all backbone creatures were related; Francis of Assisi claimed that man and beast were brothers; the poet Goethe believed all creatures to be cousins, each so moulded by his environment that he is best fitted for his methods of living.

The great controversy was started and settled around Charles Darwin who published in 1859 his book "On the Origin of the Species by Means of Natural Selection." But even before Charles Darwin his grandfather, Erasmus Darwin, born in 1731 showed the sequence of the relation between Variation and environment. Lamarck in 1809 said "The species are an illusion produced by the shortness of individual lives." Before 1780 Buffon wrote 25 volumes on natural history and in 1830 Cuvier created quite an interest in the French Academy by putting forth the theory of the multiplicity of the originals of the species as opposed to the opinion of St. Hilaire that all were descended from one ancestor.

The controversy which raged all over the Christian world in the 19th century over Evolution was comparable only to that which raged over Christianity in the first century. The dispute was between the spirit and the word. These who laid so much stress on the word did not realize that their book was written in the language of Art. Vice-chancellor lightfoot of Cambridge claimed that the world had been created on Oct. 23, 4001 B. C., and he had many followers. It seemed that the whole fabric of men's beliefs and that evolutionists had nothing to offer. Even students could not reconcile old beliefs and new facts. In the public eye, which usually considers new ideas as being wrong, evolution was monstrous. Many so-called evolutionists know nothing (Continued on page three)

### PLUMBERS' BALL RIOT OF COLOUR

Many Distinguished Guests Were Present

GRAND AFFAIR

Music Supplied by Bobby Burland's Boiler Makers

Just a few short hours before the eclipse of the sun started, a throng of happy but tired dancers left the Macdonald Engineering Building. The Plumbers' Ball was over. From the point of view of those who danced, the eclipse of the sun was eclipsed; decorations and music were all that the most fastidious followers of the dance could desire.

The impetus to move about was supplied by Bob Burland's Boiler-makers who surpassed themselves and made everybody happy. At least fourteen times during the evening the crowd called for "Too Tired" which Burland had decided to feature.

The catering was looked after by Pierre of Union caterers fame. Supper was served in two sittings, and when, in the darkness of the night, hunger had been appeased, the plumbers returned to the dancing floor and did their stuff with redoubled vim and vigour. Cigarettes were distributed to the men by the Macdonald Company.

The patronesses were, the Mrs. H. M. Mackay, J. B. Porter, E. Brown, R. de L. French, and C. V. Christie.

Among those present were: Dean H. M. Mackay, Prof. and Mrs. Nobbs, Prof. Ramsay Traquair, Mr. and Mrs. Dodd, Prof. and Mrs. G. S. G. Sproule, Mr. Ethier representing the University of Montreal, Mr. Milligan representing Toronto University with Miss A. Archibald, Mr. L. Clenneman from Queen's, with Miss M. Anson, and the Misses Thayer Allen, Marjorie Abbott, M. Armstrong, Margaret A. Auld, Bessie Anderson, Iona Bronstetter, Pearl Burkett, Helen Brown, Mary Board, Mildred Baker, Myra Byrd, M. H. Bell, I. C. Baker, Isabelle Christie, Nora Currie, Grace Cowper, Muriel Gift, Heather Cassilis, Edna Callaghan, Mona Cairne, Margaret Costigan, Ramona Coffey, I. Clairmonte, Katherine Casey, Ena Duclos, Jeanette Davidson, Constance Dawes, Gertrude Dick, Cecile Desjardins, Naomi Dunn, Rose Downey, Cecile Desbarats, J. Ellis, Marjorie Ellis, Marguerite English, Frances Ellis, Muriel Fitzpatrick, Winifred Fox, Mildred Fages, Roma Gouldthorpe, Isabelle Gerraghty, Glenna Griggs, Gladys Greig, Mabel Gilman, Beth Gibb, Eileen Greene, Lois Giday, Margaret Gilmour, Mary Hamdman, Dorothy Hudson, Lena Hubbard, Inez Hodgson, Kathleen Hart, Hazelene Herron, M. ## THE HISTORY OF EVOLUTION

Yesterday afternoon, the Biological Society of this University had the pleasure of listening to Sir Andrew Macphail on the subject of the evolution-idea, its growth and development in the minds of men. The Biological Society, which, since its inception in the month of October, has been exceedingly fortunate in the choice of its speakers, was yesterday particularly honored in hearing a famous Canadian teacher and writer on a subject closely akin to his own particular field in the Faculty of Medicine at McGill.

In the opinion of Sir Andrew Macphail, ideas have a very definite life—they are born, they live, sometimes they die, but often they continue, ever gaining in weight with the passing of the ages. Often, however, they are transmitted to the public in a very distorted form. The public retains the idea received in one particular form, and the form of this idea is long kept before the public is finally purged of it. Of all the important ideas of man, perhaps the most outstanding is that of evolution. This idea had its birth as soon as men appreciated the simple fact of variation in nature. It grew under the fostering of Greek thinkers, who occasionally expounded it in a most complete form. We have an excellent example of this in the statement "All nature is one substance, subjected to the two opposing forces of attraction and repulsion". The evolution-idea received its particular application to biology from Charles Darwin, while now, after the lapse of many years, it lives again as a great synthetic thought. This thought holds the universe as one embracing whole, out of which all differentiation evolves, out of which all matter is generated, and into which the multitudinous forms and manifestations of the unit may some day return.

Lectures of the kind delivered yesterday afternoon by Sir Andrew Macphail, popular in nature, yet teaching much, are ones that students should endeavour to attend. They are instrumental in adding much valuable general knowledge to the store of material acquired in the class room.

## CONDENSED COMMENT

The keynote of both Principal Sir Arthur Currie's and Chancellor Beattie's addresses to the Medical Undergraduates at their banquet held last night, was the necessity for diligent work on the part of all students. That a certain amount of play is also necessary to our well-being was emphasized by the fact that Mr. Beattie spent a considerable portion of his time in telling some excellent humorous stories.

Several hundred Science Undergraduates enjoyed themselves last night at the "Plumbers' Ball". Coming as it did after a strenuous week of examinations, the pleasure of dancing, always great, was considerably magnified. The decorative genius of the "plumbers" is worthy of commendation; the drab Engineering Building was very cleverly metamorphosed for the occasion.

In both her Intercollegiate contests—hockey and basketball—McGill was unfortunate, but in both instances the closeness of the score indicates that our ancient rivals were forced to extend themselves to gain the victory.

Early yesterday afternoon Dean Ira MacKay announced that today's nine o'clock lectures in the Faculty of Arts would be cancelled in order that students might have an opportunity of witnessing the sun's eclipse. As we go to press, we learn that the same action has been taken by Dean C. F. Martin of Medicine. A spectacle such as today's is one of rare occurrence and the opportunity of witnessing it without incurring an "absence" is gratefully received.

## R.V.C. INTER YEAR HOCKEY TO BEGIN

### A Large Attendance is Urged For All Practices

The first of the R. V. C. Inter-class Hockey games will be played on Tues. Jan. 27, when Third and Fourth Year meet.

Up to the present the attendance at hockey practices has not been very satisfactory, but it is expected that with the publication of the schedule of games, would-be stars will realize the importance of im-

proving their game before the Inter Year contests begin.

Of last year's College Team but three players remain; Miss F. Stockings, Miss D. Hutcherson, and Miss E. Hutcherson. However, there is much material yet to be put to the test, and chances are good.

The First Year team are particularly anxious to get together and improve, and so far they have had the largest attendance at practices.

A general practice is being held this morning at 10 o'clock on the Hollow Rink, and a large attendance is looked for, as this is the first time since the exams that "Shag" has been out to cough.

## NOTICES

### CLASS HOCKEY

In answer to several requests the schedule of the remaining games to be played is again published. All interested are advised to cut this out as it will not likely appear in the "Daily" again.

The following are the games:—  
Jan. 26, 5.10 Law I.—Com. I.  
Jan. 26, 6.10 Med I.—Arts I.  
Jan. 27, 5.10 Dent. II.—Com II.  
Jan. 27, 6.10 Med Arts II.  
Jan. 28, 5.10 Med. III. Arts. III.  
Jan. 28, 6.10 Law II. and III.—Theol.  
Jan. 29, 5.10 Med. IV.—Arch.  
Jan. 29, 6.10 Se. III.—Dent. I. and III.  
Jan. 30, 5.10 Arts IV.—Med. V.  
Jan. 30, 6.10 Se. IV.—Com. III.  
Feb. 2, 5.10 Se. I.—Com. I.  
Feb. 2, 6.10 Arts I.—Law I.  
Feb. 3, 5.10 Se. II.—Com. II.  
Feb. 3, 6.10 Arts II.—Dent. II.  
Feb. 4, 5.10 Arts III. Law II. and III.  
Feb. 4, 6.10 Med. III.—Theol.  
Feb. 5, 5.10 Se. III.—Arch.  
Feb. 5, 6.10 Med. IV.—Dent. I. and III.  
Feb. 6, 5.10 Arts IV.—Sci. IV.  
Feb. 6, 6.10 Med. V.—Com. III.  
Feb. 9, 5.10 Med I.—Com. I.  
Feb. 9, 6.10 Se. I.—Law I.  
Feb. 10, 5.10 Med II. Com. II.  
Feb. 10, 6.10 Se. II.—Dent. II.  
Feb. 11, 5.10 Arts I.—Com. I.  
Feb. 11, 6.10 Med. I. Sci. I.  
Feb. 12, 5.10 Arts II.—Com. II.  
Feb. 12, 6.10 Med. II.—Sci. II.

### MECHANICAL CLUB

Members of the above club will visit the plant of Jenkins Bros. on Wednesday afternoon, January 23. The party will meet at the Union and will leave at 2 p.m. sharp.

### SCIENCE I CLASS HOCKEY

Will all those in Science I who wish to play class hockey turn out to-day at 2 p.m. for a practice on the Campus Rink.

### "MEDICAL DANCE"

The designs for the Medical Dance are to be handed in to Crawford, New Medical Building, not later than Monday Jan. 26th. The designs will be judged immediately and one ticket given to the winner.

### CLUB EXECUTIVES

Arrangements have been made with Notman's to take the following groups on the day and hour given below. To avoid confusion will any group which cannot follow this schedule please communicate with the Photographic Editor at the Annual Board room at the Union. The sum of seven dollars (\$7.00) must be paid at the time of sitting unless other arrangements have been made with the Annual Board.

### MONDAY JAN. 26.

1.30 p.m.—Arts Undergrad.  
2.00 p.m.—Physiological Society.  
5.00 p.m.—Electrical Club.  
5.20 p.m.—Dental Undergrad.  
5.40 p.m.—Law Undergrad.

### TUESDAY JAN. 27.

1.30 p.m.—Student's Council.  
5.00 p.m.—Union House Committee.  
5.20 p.m.—Daily Editorial Staff.  
5.40 p.m.—Science Undergrad.

### WEDNESDAY JAN. 28.

1.30 p.m.—R.V.C. Undergrad.  
5.00 p.m.—American Club.  
5.20 p.m.—Canadian Club.  
5.40 p.m.—Chemical Society.

### THURSDAY JAN. 29.

1.30 p.m.—R.V.C. Music Club.  
2.00 p.m.—Societe Francaise.  
5.00 p.m.—Cercle Francais.  
5.20 p.m.—Chemical Industry Club.  
5.40 p.m.—Chess Club.

### FRIDAY JAN. 30.

5.00 p.m.—Classical Music Club.  
5.20 p.m.—Cosmopolitan Club.  
5.40 p.m.—Choral Society.

### ARTS '27

Tickets for the Arts Dinner are now on sale. See Jack Duckworth or Lawrence Hart without delay.

### ATTENTION RUGBY

Will all those men who received Certificates of Award for first grade colours last year, and who played at all this year, please leave their Certificate in the Athletic Manager's office for further entry.

C. COPE, Mgr.

### M.S.P.E. — MACDONALD BASKETBALL

The third M.S.P.E. basketball match of the season will be played at Macdonald College Thursday Jan. 29th, at 5 p.m. The train will leave the Bonaventure Station at 4 p.m.

### LOST

Waterman fountain pen, with initials V. R. Please return to the porter at R.V.C.

### SOCCER CLUB

All members of the 1st and 2nd teams possessing soccer jerseys and stockings are requested to turn these in immediately to Mr. Hay Finlay, Molson Hall.

### LOST

A white woolen toque with red and black border. Name of owner "Doug" sewn in red wool inside. Finder please leave with porter of Arts Bldg.

### JUNIOR LEAGUE POSTERS

A prize of \$30 has been offered by the Junior League of Montreal for the best poster to be used for the purpose of bill boards, advertising their forthcoming revue "Footlight Fancies".

All competitors should bear in mind that the posters must be in black and white and one flat color, and must embody the following: "The Junior League of Montreal presents Footlight Fancies, a Musical Revue, Orpheum Theatre, April 21st-25th."

All posters should be sent to the Junior League Office, Room 205 Medical Arts Building, not later than March 2nd. For further information please phone Miss Mary Macintosh, Westmount 3936.

The width of the posters should equal to 21-2 times the length.

### SKIERS

The Winter Outing Club is endeavouring to make arrangements with the Montreal Ski Club whereby anybody wearing the badge of the outing club may have the use of the Club House and of the jump hill for practice. Everyone now a member or intending to join should sign their name on the sheets placed on the notice boards. We are asked to show a certain standing of membership in the Montreal Ski Club and prompt compliance with the request would be much appreciated.

Outing Club badges may be had from:—

W. Hurd, Arts III.  
T. M. Brown, Med. I.  
Percy Costigan, Science II.  
Lawrence Hawley, Med. I.  
HOWARD L. ELLIOT.  
Mgr.

### ROWING CLUB

The executive of the Rowing Club wish to make it known that it is pleased to place the boathouse at the disposal of any members of the club who wish to organize a sleigh-drive providing one of the executive is present. Anyone desiring to do so however, is requested to notify the executive beforehand.

### ARTS DINNER

The Arts Dinner will be held at the Mount Royal Hotel, on Thursday, January 29th, at 7.30. Tickets may be had from the following: R. V. Fortune, M. Lidstone, C. E. T. Jones, Lawrence Hart, Bill Murchison.

### R.V.C. A.A.

A meeting will be held on Monday Jan. 26th, at 4 p.m. in the Common Room.

Business:—Awards and Hockey.

### RIFLE ASSOCIATION PICTURE

Will all members of the Rifle Association who desire copies of the Picture, or who wish to see the proofs, please apply before noon to-day to C. H. Herbert Comm. '27.

### UPPER CLASS BASKETBALL

Any years wishing to enter teams in the Upper Class basketball play-off, should hand their entries in to Mr. Van Wagner, or J. R. Frith, Science '27, before Wednesday January 28th. Practice hours may be obtained from Mr. Van Wagner. No entries will be accepted after the above date.

### DELTA SIGMA SOCIETY

There will be a very important meeting of the executive on Monday Jan. 26th at 1 o'clock in Room 2 R.V.C. Will every member of the executive please try to be present, especially the Year Reps.

### NOTICE

Photographs of all societies should be taken as soon as possible in order to ensure their inclusion in the Annual. Appointments can be made by telephoning to Notman's. Seven dollars will be collected at the time of sitting.

### LOST

Fraternity pin, gold with black shield, Pinder kindly phone. Plat. 0474.

### MACCABAEAN CIRCLE

The next meeting of the Maccabean Circle will be held to-morrow, Sunday January 25th at 3 p.m. in the McGill Union.

Mr. Michael Garber, B.A., B.C.L., will speak on: "Have the Jews a Mission?"

Miss Hilder Blumner will render several piano solos.

### CLASS GROUPS

The following class groups are in the hands of the Annual Board, and may be obtained at the Board room any day between one and two or between five and six o'clock. The reduced price of ONE DOLLAR a copy for these pictures only holds good until January 28, so that it will be necessary to get all orders in before that date. Cash with order.

Sci. '25, '27, '28. Law '25, '27. Arts '28, Dent. '28. Med. '28, '29. Pharmacy.

### CONSERVATORIUM OF MUSIC

The group photograph of the Undergrads will be taken to-day at 1 p.m. Please make it a point to be present and get into Old McGill 1925.

### CLASS HOCKEY

The following is a revised schedule of practice hours on the Campus Rink. It will be noticed that a few alterations have been made to the one published Tuesday last.

### MONDAY

10-11 Vacant.  
11-12 Vacant.  
12-1 Dent. II.

2-3 Arts 4.  
3-4 Vacant.  
4-5 Vacant.

### TUESDAY

10-11 Vacant.  
11-12 Vacant.  
12-1 Med. 2.

1-2 Arts 3.  
2-3 Med. 3.  
3-4 Vacant.

4-5 High School.

### WEDNESDAY

10-11 Vacant.  
11-12 Law 2 and 3.  
12-1 Vacant.

2-3 Vacant.  
3-4 Vacant.  
4-5 Med. I.

### THURSDAY

10-11 Vacant.  
11-12 Law I.  
12-1 Arch.

2-3 Comm. 2.  
3-4 Comm. 3.  
4-5 High School.

### FRIDAY

10-11 Comm. I.  
11-12 Dent. 1 and 3.  
12-1 Vacant.

2-3 Arts 2.  
3-4 Theol.  
4-5 Arts I.

### SATURDAY

10-11 High School.  
11-12 Vacant.  
12-1 Sci. 4.

1-2 Sci. 3.  
2-3 Sci. I.  
3-4 Med. 4.

4-5 Med. 5.  
5-6 Sci. 2.  
6-7 Vacant.

No further alterations will be made in this schedule except in very necessary cases.

### SICK STUDENTS

Out of town students, confined to hospitals or their rooms will be sent flowers by the Ladies' Auxiliary. If the names are left at Strathcona Hall or with Mrs. Willey, Up. 3201.

### BAND PRACTICE

Another date to be added to the program of the Band is Feb. 11th. This is the night on which the band will assist the Musical Association in Broadcasting from the Northern Electric Station. Further information will be given out at the next practice.

### WRESTLING

Practice Monday Wed. and Friday 5 p.m. in Strathcona Hall.

### BOXING

To-day at 5 o'clock Molson Hall.

### R.V.C. A.A. EXECUTIVE

The picture of the A.A. Executive will be taken at 1 p.m. on Tuesday, January 27th, at Notman's.

# QUEENS' SIX SCORES TWO GOALS IN FINAL STANZA TO BEAT MCGILL TEAM

Score 3-1—Superior Combination Gave Tricolour Victory—O'Donnell Scores McGill's Lone Tally—Team Shows Improvement Over Last Week—Brilliant Individual Rushes—Reid, in Goal, Stopped Fifty Shots

Jack Hardy Arena, Kingston, Ont. (Daily)—With the score tied at the end of the second period, the Tricolour Six came back in the third stanza to score two goals and beat McGill in a scheduled intercollegiate hockey game here to-night. At the end of three periods of hard play Queen's had scored three goals to McGill's lone tally.

The McGill outfit showed considerable improvement over her play against Toronto last week, and although beaten, gave evidence of careful coaching. Weakness was displayed in passing, which did not reach the standard attained in practice. Individually the McGill men played very well, but there was a marked lack of the combination that is necessary to win hockey games.

Art Abbott showed very good form, standing out particularly when Mickles and McMahon were in the penalty box. His tricky play on more than one occasion kept Queen's from scoring. The hero of the game was Jerry Reid, guarding the nets for the red and white. During the three periods, he stopped no less than thirty shots, some of them coming in fast and at a difficult angles. The Queen's goalie did not have nearly as much work to do.

The pick of the Tricolour squad was Voss, who played consistently throughout the game. Only 1000 spectators were present.

Detailed play follows:—

## FIRST PERIOD

The game opened fast with an exchange of rushes, but neither team got close enough to shoot on a rush and Voss relieved Brown and Boucher combined from centre, but were stopped at the defence. Mickles came down, but his shot was blocked and Boucher was chased into a corner on a return. Mickles relieved and Brown rushed back, but lost, and Abbott went as far as Queen's defence.

Bell rushed one down and slipped it past Quinn, but McGill was offside and the goal did not count. A minute later Lindsay shot one for Queen's but another offside spoiled it. Bell tried hard, but Quinn blocked the shot and Bell again blocked Queen's rush and raced down the side and was off on his shot.

A nice piece of combination by Voss and Boucher was wrecked by Hayes and McMahon, and on an exchange of rushes Queen's nearly netted one. McGill's defence was taking care of Queen's rushes, but the red and white attack was weak. Mickles made a nice rush, but his shot was wide. Boucher was warned for tripping.

McMahon raced through the centre, passed to O'Donnell, who drove a hard one past Quinn. McGill, 1; Queen's, 0.

McMahon and Bell combined again, but Bell's shot was across the net and Quinn deflected it into the corner. It was a nice play.

Queen's good backchecking was breaking up McGill's combination and keeping play around mid-ice. Voss went through on a solo, but Reid took care of his shot and Abbott zig-zagged down, but his shot went to the far corner. Mickles took it all the way and caught the rebound, but Quinn blocked it and McMahon, just missed hitting in the second rebound. Quinn was lucky on the play. Pelton relieved and Boucher was benched for tripping Abbott on the return rush. A moment later Bell was sent off for the same offence. The period ended: McGill 1; Queen's 0.

## SECOND PERIOD

Each team was a man short when the second period opened. Boucher and Bell being off for tripping. Lindsay was wrecked on McGill defence when he tried to go through. Boucher and Bell returned. Brown went down, but the defence stopped him. Bell went through twice, but had to go into corner. McMahon was benched when he tripped Boucher, and Lindsay dove through to the goal

mouth but missed. On the next play Mickles stepped into Boucher and two McGill men were in the penalty box. Despite this Abbott went down, and Hayes relieved Queen's rush. With four men to six McGill broke up every play Queen's made. Pelton was chased for slashing McMahon. Pelton raised the net Mickles off for a heavy check on Voss who was racing down. McGill neatly relieved a dangerous backing play near their net, and the puck travelled to Queen's end.

Boucher grabbed a loose puck and drove one at Reid, and on the next play Lindsay sent in another hard one which Reid was lucky to stop. Boucher missed a nice pass by Lindsay out in front, and the crowd groaned.

Hayes broke out, but was stopped by the defence. Brown raced on but was wide on his shot, and O'Donnell was sent off for loosing.

Boucher lifted one over the defence which Reid saved nicely, and the timers' bell broke up a scramble near McGill's net. Mickles went down and led to Brown, who dashed up and from the right wing and close in drove one past Reid McGill 1, Queen's 1.

Queen's heartened by the score pressed the play for a few minutes, stalling a barrage of hits over the defence which Reid handled well.

Hayes made a neat rush, but Abbott was offside on the pass. McGill rushed the play but Queen's came back. Abbott went to the defence and lost. Leuch off for slashing on next play and Whittin tried but Reid was too good. Abbott and Mickles combined all the way and Quinn was lucky on the shot. A moment later Mickles just missed. Abbott's pass right out in front. Leuch came back and just missed getting one after stickhandling his way through the McGill defence.

Voss lost the puck in front and Brown drove a hard one into Reid's pads and in a minute Brown shot one in which Reid was lucky to stop. Lindsay was hurt but stayed on. Period over: McGill Queen's 1.

## THIRD PERIOD

McGill rushed, but Boucher secured and went down, testing Reid with a high slow one, through the defence, which Reid cleared. McMahon was loose and sent a hard one at Quinn's pads from outside and Voss took it back, losing at the defence.

Abbott and Hayes combined through but latter's shot was high. Play is fast. Brown's was checked at McGill's defence and Hayes went back and sent a hard low one at Quinn which made the crowd gasp. Quinn cleared well.

Voss just missed the return and Bell raced up the side and sent the crowd pale when he laid a neat one on Quinn's pads. Abbott went in and around the nets before being checked and the play seaward up and down the turn aside.

The teams:—  
McGill Goals ..... Quinn  
Reid ..... Defence  
Hayes ..... Voss  
McMahon ..... Pelton  
Mickles ..... Centre  
Lindsay ..... Wing  
Abbott ..... Boucher  
Bell ..... Brown  
Subs  
O'Donnell ..... Leuch  
Smith ..... Whitton  
Cameron ..... Sub. goalie  
Referee Jos. Smith, Kingston.

## Summary of Play

First Period  
O'Donnell McGill 10:57.  
Second Period  
Brown Queen's 11:01  
Third Period  
Pelton Queen's 10:35.  
Boucher Queen's 10:35.

# THE HISTORY OF THE IDEA OF EVOLUTION

(Continued from page one)

about evolution, but had a malicious joy in finding scientific warrant for their inherent atheism. McGill never yielded to this influence and throughout all the struggle Sir William Dawson kept his head.

By the end of the 19th century evolution was the victor, and even if Sir William Dawson were in his prime he must have admitted that the universe arose by evolution and not by "specific acts of original creation." The giraffe grew a long neck, the birds wings, and the fish fins, in response to their environment. Man grew a thumb to hold a stick, and so obtained dominion over the beasts.

These facts were meaningless without reason, and Bishop Berkeley naively asked for evidence that matter actually existed. Since none was forthcoming he propounded the theory that there is no matter apart from the human mind.

But, the speaker asked, is mind or body master? Mind forces the speaker to do so before Tuesday, at the necessary amount of plates must be estimated by then. Each class has its own representative from whom tickets may be obtained.

The toastmaster for the evening will be Bob Fortune, President of the Arts Undergraduate Society.

climb upward. It forces the student to study and the soldier or martyr to their duty in spite of fear of death. Man is greater than beast precisely to the extent to which the mind controls the body, compelling it to scorn delights and to labour.

A new conception arose of an Eternal power carrying out its purpose by natural power alone. The speaker once asked a great football player why he was a great football player. "Because I wanted to be," was the answer, but when asked why he wanted to be he didn't know. The reason is the same for the man and for the giraffe's long neck, because it was the purpose of the eternal power.

There was a time when men came to the university to be educated. Sir Andrew does not know why women come, what happens to their minds while they are here, and even less of what happens to them after they are gone, but the men emerged with some education and a philosophy of life. That such is not so much the case now is not altogether the fault of the student. There is so much new knowledge that the university is bewildered. It is often censured for being too practical, but it is now in a period of renaissance and in time will find itself and education will return.

Current history is the hardest to read but the speaker could see that the idea of evolution is rapidly spreading in the new soil formed by the fusion of matter and mind.

"Biologists now agree to assume that the whole universe is composed of the same matter, having an essential unity, in spite of the diversity of elements, and in similar conditions acting in the same way, that is evolution of the forms assumed by matter, that the universe, once electronic, which developed to the atomic and farther to the molecular form, living matter rose from non living matter when elections joined to form atoms and atoms to form molecules, when earth became cool enough to yield water to form colloids from which came living matter."

Julian Huxley, grandson of the well-known naturalist is firm in the belief, as is Sir Andrew, that all matter, living or not is associated with something of the same general description of mind in the higher animals, a substance of not only material but mental properties known

as world stuff. Bertrand Russell thinks that matter consists of hydrogen nuclei and elections which are therefore the only true "elements," but these may be a modification of some fundamental substance." No physicist really means to assert that an election is a little lump of matter." It may be only a disturbance in the aether maybe like noise.

All life is one, continuous and uniform, but we must be careful of the assumption of continuity which the essence of the Newtonian conception of physical occurrences, for recent observations of the elections are disturbing.

Life is the final expression of the universal will. This is the inner meaning of evolution. "To live according to this Will is the unconscious desire of the Giraffe who achieves a long neck in order not to perish," that this will be done in himself is the final end to which every rational human being aspires daily in order that he may not perish too. Giraffes and men who try to live without conformity to this Will will come to a bad end.

The scientist can now be religious. It was not so in Sir William Dawson's time.

Every creature looks out upon the universe through eyes that enlarge in the process of evolution. When the eyes look in different directions the result is discord and death; when the eyes look forward and give guidance in conformity to the Will that governs, the result is peace and life.

"At times it does happen that there are persons of extreme perception to whom this Will is especially revealed. The one through whom this Will was most especially revealed found his final authority in this: 'I am come that men might have life, and have it more abundantly.'"

Jack—"Do you object to kissing on sanitary grounds?"

Jacquette—"Oh, no."

Jack—"Then let take a little stroll through the infirmary."

Sun Dodger (U. of Wash.)

Judge: Who brought you here?

Drunk: Two policemen.

Judge: Drunk I suppose?

Drunk: Yes, sir both of them.

# AMERICAN PRESBYTERIAN CHURCH DORCHESTER & DRUMMOND STS. MONTREAL

Preachers next Sunday

Morning at 11 a.m. Rev. Prof. W. C. Graham, D. D.

Evening at 7.30 p.m. Dr. J. A. MacDonald of Kongmoon, South China.

Who will preach on:

"The Doctor and the Future of China"

3 p.m. The Church School. The Young Men's Class.

7 p.m. The Musical Prelude.  
Largo by Handel; Pastoral Sonata by Rheinberger;  
Andante by Hollins.

Organist and Choir-director: Mr. Bryceon Treharne.

# ST. JAMES METHODIST CHURCH

Minister: Rev. G. A. McIntosh, M.A., B.D.

11.00 a.m. Christ As the Ideal Radical and Conservative. For Leaders and Missionaries.

7.30 p.m. Anchors That Hold In Times of Storm.

7.00 to 7.30 p.m. Musical service.

3.00 p.m. Young Men's Club: Leader, Mr. S. H. Johns.

All are cordially invited to these services.

# EMMANUEL CHURCH

(Congregational)

Drummond Street Just Below Sherbrooke St.

Rev. J. W. G. Ward, Minister

Services Morning at 11. Evening at 7.30.

Mr. Ward is preaching a series of sermons in the evening on

"QUESTIONS OF THE HOUR"

Subject for Sunday evening "Miracles and the Modern Mind."

You are cordially invited.

Cut out for future reference

# MANY GRADS. TO BE AT ARTS BANQUET

Adneys Orchestra Engaged For The Occasion

That the coming Arts dinner to be held at the Mount Royal Hotel next Thursday evening will be an unqualified success is assured by the fact that graduates of the last few years have procured tickets in large numbers. Many of these B.A.'s are at present attending the University in other faculties, while there are a number who are out of college but seize this opportunity of reuniting and of singing the old Arts songs again. This of course, will greatly enhance the already admirable program arranged, which has on it names like R. L. Calder, K.C., Sir Arthur Currie, Dr. Ste-

phen Leacock, Dr. Ira MacKay and others.

Another announcement which will be of great pleasure to Arts men is that the far-famed Adney's Orchestra has been engaged to render the music. The ability and popularity of this orchestra requires no more than passing mention, for Adney's Orchestra is always a synonym for good music. There are several sections prepared in which the men present will be afforded the opportunity of displaying their undoubted talent and technique as vocalists. The graduates have been earnestly training for this event and perhaps they will be prevailed upon to render solos.

The sale of tickets which started but two days ago has been unusually brisk and the returns from the Sophomore and Freshman years have been encouraging. However, it is announced that they then desiring to procure postcards had better

## TWO THRILLING OVERTIME PERIODS GAVE BASKETBALL VICTORY TO TORONTO TEAM

**Final Score 38-34—End of First Overtime Period 32 Draw —Potter the Individual Star of the Game — Scored More Than Half of Varsity's Points—"Bozo" Manson Gave Great Exhibition—Victory Places Toronto in Lead in Intercollegiate Series.**

Two baskets scored by Potter in the second five-minute overtime period of last night's Toronto-McGill senior basketball contest at the Montreal High. gave Varsity the victory in one of the closest and hardest-fought games in intercollegiate annals. At time the score was 30-30. After five minutes extra play it stood 32-32. And after five minutes more Toronto was ahead 35-34.

As the score indicates it was anybody's game right through to the end. A dozen times the score was tied. Neither side could gain a commanding lead, first Toronto would forge ahead, then McGill, the slim one and two point margins vanishing almost as soon as made. With the game almost ended McGill seemed to be headed for a win but just before the whistle Potter sent in the basket that tied the score and the contest went into overtime. Potter undoubtedly won the game for the Blue and White, scoring more than half of the victors' points. He counted 7 baskets and 12 free throws.

The whole McGill team played a wonderful game. Their combination was good and they ended the contest with a furious attack that almost gave them victory. Turpel and Philpott started as forwards with Boucher getting on to play through-out practically all the second half. Manson was centre man, Brown relieving him toward the close and playing the overtime periods. Quackenbush and Hilton started on the defence with Rafalovitch getting in to the game in the second half. "Bozo" lead the McGill scorers with 4 baskets and 3 free shots. Philpott made two and 5. Brown sent in 2 for four points, and Boucher counted the same with one basket and two free throws. Captain Turpel also scored two baskets.

Quackenbush, Hilton and Rafalovitch played great games on defence. Stan's wonderful work being outstanding.

Toronto went into the lead first after the Red and White's opening attack failed to count when two baskets and one free throw gave them five points while McGill had only counted two. When Turpel took a pass from Phil and scored. Then after McGill's shots had been missing by inches Manson sent one in only to have Potter do the same for Toronto. A free throw by Manson and a basket by Philpott who had taken a pass from Quackenbush after the latter had intercepted a Varsity throw tied the score at seven all. A fine shot by "Bozo" from the side put McGill ahead, but the Red and White fell back again when Toronto scored twice. Once more the score was even when Manson put in his third, but a free throw by the Varsity centre gave the visitors a one point lead at half time. Score: Toronto 12; McGill 11.

Boucher had gone on for Turpel at the close of the period and he started the second half. Manson opened the scoring with a free throw and Bouch put the Red and White into the lead with another, but two sent in by Potter reversed the standing. Things were switched again when Hilton did the same and the Red and White's margin was increased when Philpott took a pass from Boucher and scored from half way out. Rafalovitch went on for Hilton. Toronto scoring a penalty shot, and then getting ahead on baskets by the

### SUSPENSIONS

(Dept. of Physical Education.)  
S. S. Miley, Theo. II.  
W. H. Cohen, Pharmacy III.  
H. P. Melanson, Med. I.

### NOTICE

The executive of the Winter Outing Club would be obliged if some men interested in the club and who are not taking part in the events of the day would turn out at ten o'clock this morning at the campus. No matter how well marked a trail may be there are always places where it is very helpful to have direction given. It would be greatly appreciated if some would be there in skis ready to help the officials on the trail.

HOWARD L. ELLIOT, Mgr.

Howard have kindly consented to act as Judges.

### LOST

Pisquin gloves in the Union. Kindly leave with porter.

## ATTEMPT TO LAUNCH MEDIAEVAL REVIVAL

A group of American scholars is now launching a movement aiming at a "Mediaeval Revival." It is announced by Professor Harry M. Ayres of the English Department of Columbia, Organization in the United States of an Academy of Mediaeval Studies is one objective in a broad plan which includes the publication of a Journal of Mediaeval studies, research and the establishment of traveling scholarship. John Nicholas Brown of Providence, R. I., a graduate of Harvard in the class of 1922, has given \$3,000 toward a fund to establish the Journal. Professor Ayres disclosed. The general project, it was explained, originated with the Committee on Mediaeval Latin Studies of the American Council of Learned Societies which met at Columbia recently. Prof. E. K. Rand of Harvard has been elected editor-in-chief of the new Journal.

"The principal contributions to this new periodical," said Professor Ayres, "will be those which shed light upon mediaeval life and thought as set forth in historical literary, and philosophical texts the history or appreciation of mediaeval Latin texts which lay claim to independent literary worth and interest; and reviews of books, monographs, and articles in the mediaeval field."

"It concerns will be with all phases of mediaeval life and thought. Hence it will appeal to the cultured man and woman of the street as well as to those in colleges and universities."

"The mediaeval journal," Professor Ayres continued, is only part of the program of the Committee on Mediaeval Latin Studies. Its aim is to present a comprehensive view of mediaeval Latin civilization in relation to the classic past, to its own period, and to the present age. The plans for publishing include in addition to the journal, editing mediaeval texts, printing monographs, and providing for translations of mediaeval Latin classics in uniform series on the order of the Loeb classics. Members of the Committee are already assisting in the international project for a new Mediaeval Latin Dictionary.

"The plans include also provisions for research and for traveling scholarships comprehending all Latin aspects of mediaeval civilization, from linguistic studies to mediaeval art. Ultimately, it is proposed to organize in the United States an Academy of Mediaeval Studies."

### HELP!

Old Lady: "Say Pilot, stop this plane a minute, please."  
Pilot: "What for?"  
Old Lady: "My Willie just climbed over the side."  
She—Robert, are you shimmyming?  
He—No! I just put on my winter flannels.  
—Ex

tication. Those in the Ski Proficiency Test must leave the M. S. C. house at 1.45 sharp.  
For the jumps which will take place at 3 p.m. students may exchange ticket No. 23 for a tag which will admit them free of charge. This must be done before the office closes to-day.

## Partial Eclipse Of Sun To-day

(Continued from page one)

"The man will of course, throw a shadow on the wall. Now if he passes between this lamp and a picture hanging on that wall his shadow will fall on the picture and it will be eclipsed. That is exactly what will happen Saturday. The moon will throw off a conical shadow, the apex of which in this case, will extend into the surface of the earth and a dark elliptical shadow will result from the interpenetration of this cone with the earth's sphere. That shadow will bring on all the appearances of night."

At the moment of eclipse the sky will be overcast. In the path of the shadow it will be pitch dark, and stars of the first and second magnitude and the brighter planets will be seen. In some cities street lamps will have to be lit.

### Smoked Glasses

Millions of people will no doubt witness the great event since it is occurring in the most inhabited sections of the continent. The eclipse will be partial from Greenland to the Amazon river, a belt of 4,500 miles.

Mr. Kelly stressed the necessity of using smoked glasses or other similar means if one wishes to obtain the best of results. To view the eclipse with the naked eye, he warned, would be exceedingly dangerous. "No one can really look at the sun for any length of time," he said. "Should one attempt to do so serious injury and even blindness may come to one's eyes."

### PROVE EINSTEIN

Some of the things which scientists hope to find out on Saturday morning are:—

1—Ultimate proof of the Einstein theory. The "die-hards" will make their last stand. During the last two total eclipses the rays of light coming from the distant stars were bent as Einstein predicted, due to the proximity of the moon's mass. Some scientists, however, held that the bending of these rays was due to the light being refracted upon penetrating the cooler air in the cone of the moon's shadow. A special apparatus has been set up to make any allowance for this.

2—To determine the exact diameter of the moon, which now stands at 2,163 miles.

3—To ascertain the exact path of the moon which wanders off its orbit, and is not always where scientists figure.

4—To test the effect of the eclipse on radio waves. A special test is being carried out under the direction of the "Scientific American."

5—Nature of the corona.

How you get the black eye?  
"Well, a girl told me she kissed."  
"Yes."  
"Being doubtful, I thought, I would see if she lied."  
"Well?"  
"She did."  
—Ex

Chem. Prof.—And the price of nitrates is now very high.  
The Goo!—What do we care? We never telegraph.

Sho—"Don't you think that Myrtle looks ugly in that ultra-low-cut dress?"  
He—"Not as far as I can see."

As she stifled a yawn, she asked sweetly, "Is your watch going George?"  
"Yep," answered George.  
"How soon?"  
—Ex.

Those Memory Wizards...  
"I know all the telephone numbers in town."  
"How extraordinary."  
"... Only I don't know who they belong to."
